## SUMMARY

Independent, curiosity-driven technologist who actively seeks out challenges and builds beyond requirements. Fast learner with a strong focus on innovation and adaptability in unfamiliar environments.

## TECHNICAL SKILLS

**Programming:** C++, C, Python, Flutter, Dart, HTML, CSS, Java.

**Software & Tools:** Android Studio, FlutterFlow, Supabase.

**Specialized Areas:** OOP, Software development, and AI foundations.

## WORK EXPERIENCE

### **Intelligent Systems Labs - Research Assistant (October 2025 - Present):**

- Assists in research focused on intelligent systems and AI, supporting data analysis, experimentation, and documentation under academic supervision.

### **Big Impact Products – AI Automation Developer Intern (August 1, 2025 -September 1, 2025):**

- Helped in building a cross-platform app using Flutter, FlutterFlow, and Supabase, integrated with AI automation to streamline customer engagement and increase Google reviews for businesses by 50%.
- Designed and implemented backend workflows that automate review requests, feedback collection, and analytics.

### **CIB – Summer Intern (July 14, 2025– July 31, 2025, 70 hours ):**

- Explored emerging technologies in banking through hands-on workshops on AI, data analytics, and cybersecurity. - Gained insight into digital finance, sustainable banking strategies, and risk management in a real-world corporate environment.

### **British Council - TCA (July 1, 2025 - August 1, 2025):**

- Designed and led engaging educational activities that fostered creativity, collaboration, and problem-solving among youth participants.
- Created a safe, inclusive, and engaging environment aligned with UN child rights guidelines and British Council health and safety regulations.

### **Telecom Egypt – Trainee (Jan 2025 – Feb 2025, 30 Hours):**

- Gained hands-on experience in the **efficiency optimization of AI**.
- Developed skills in **data training, preprocessing, and cleaning**.
- Worked with **large datasets** and learned key **ML/AI principles**.

### **Semicolon Python Track – Trainee (August 2024 - October 2024):**

- Reached **intermediate proficiency in Python**, focusing on **OOP concepts**.

### **NodeCraft (IEEE AASTMT SB) – Instructor (May 2025):**

- Delivered a hands-on session teaching participants how to work with APIs, covering concepts from fundamentals to advanced applications.

### **VGM (Video Game Makers) – Instructor (March 19 2025):**

- Led a comprehensive game development bootcamp with over 50 engineers, teaching **Unity (#C), advanced game mechanics, and animation techniques**.

## LEADERSHIP AND EXTRACURRICULAR ACTIVITIES

### **Egyptian American School Model UN (EASMUN) – Secretary-General:**

- Managed 80+ delegates and 5 heads, organizing a conference with 150+ attendees from various schools across the city. - Initiated the first-ever EASMUN conference, establishing a sustainable structure for future events.

### **IEEE AASTMT SB – Volunteer:**

- IT & Web, Technical AI, and Registration volunteer.

### **CPC - AAST**

- Participated in the ECPC 2025 (Ranked 7th in AASTMT)

### **Formula Student (FSAE) - Driverless sub-team:**

- Working on the development of the localization package.
